2004 – CAD Data Management Customers Must Compromise

Pro/INTRALINK 3.X

Strengths:

- ⊙ Full Pro/E Workgroup Level Data Management Functionality
- ⊙ LAN Performance
- ⊙ Customer Already Owns

Weaknesses:

- ⊙ Enterprise Capabilities
- ⊙ WAN Performance
- ⊙ Extended Enterprise Access
- ⊙ Multiple Client UI's

Windchill 7.0

Strengths:

- ⊙ Enterprise Capabilities
- ⊙ WAN Performance
- ⊙ Modern Architecture (Scalability, Security, Integration)
- ⊙ Single Client UI

Weaknesses:

- ⊙ Full Pro/E Workgroup Level Data Management Functionality
- ⊙ LAN Performance
- ⊙ Upgrade Path from Pro/I 3.X Costly

2005 – Eliminating the Compromise

Pro/INTRALINK 8.0 – A Single Solution with Modular Packaging to Eliminate Compromises

Strengths:

- ⦿ Full Pro/E Workgroup Level Data Management Functionality
- ⦿ LAN Performance
- ⦿ Customer Already Owns

Strengths:

- ⦿ Enterprise Capabilities
- ⦿ WAN Performance
- ⦿ Modern Architecture (Scalability, Security, Integration)
- ⦿ Single Client UI

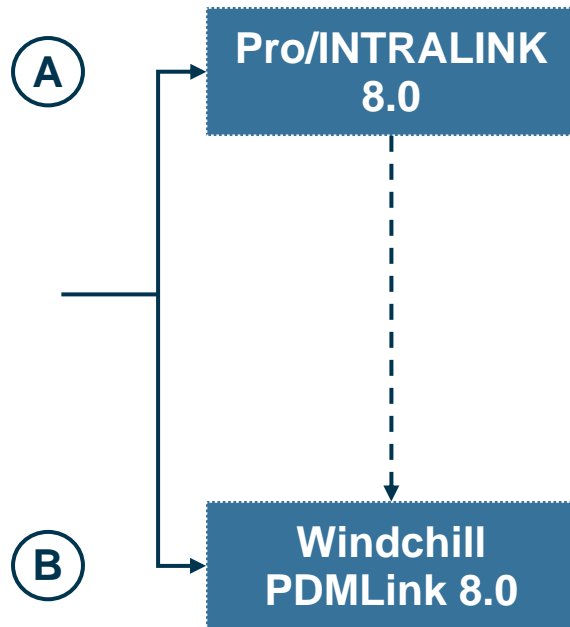

Weaknesses:

- ⦿ Enterprise Capabilities
- ⦿ WAN Performance
- ⦿ Extended Enterprise Access
- ⦿ Multiple Client UI's

Weaknesses:

- ⦿ Full Pro/E Workgroup Level Data Management Functionality
- ⦿ LAN Performance
- ⦿ Upgrade Path from Pro/I 3.X Costly

Pro/INTRALINK 3.x Customers Have Multiple Options

- ◉ Next generation Pro/ENGINEER workgroup data management
 - ◉ Modern Windchill architecture
 - ◉ Simple starting point with growth potential
 - ◉ Included with Pro/INTRALINK maintenance
 - ◉ Robust migration capabilities and training support
-
- ◉ All of the capabilities of Pro/INTRALINK, plus: multi-MCAD / ECAD, CMII change management, advanced configuration management, turnkey
 - ◉ Best to obtain all the benefits of the PDS
 - ◉ ERP integration, etc.
 - ◉ One solution for workgroup and enterprise PDM
 - ◉ Requires purchasing licensing upgrade package
 - ◉ Option to add Light user pricing
 - ◉ Robust migration capabilities and training support

Differences Between Pro/INTRALINK & Windchill PDMLink

Pro/INTRALINK 3.x

- Pro/E versioning & vaulting
- Workgroup collaboration
- Basic lifecycle mgmt (simple release)
- Basic document mgmt
- Basic configuration mgmt (baselines)
- Content replication (multi-site version)
- Basic visualization
- Optional advanced visualization
- Basic search
- BOM/ Relationship reporting

Pro/INTRALINK 8.0

- Improved distributed (WAN) performance
- New Web-based architecture
 - Streamlined Pro/ENGINEER Wildfire interactions
 - Expanded visualization
 - Scalability
 - Advanced security/ firewall/ LDAP
 - Eliminates client installations
 - Cross-locale support
- Additional capabilities
 - Enhanced document mgmt
 - Improved Difference Reporting
 - Expanded History Reporting
 - Rename history
 - Save As history
 - Location history
- Optional Archive module

Windchill PDMLink 8.0

- Complete product definition
 - Ability to add 3rd party MCAD and ECAD integrations
 - Define and manage enterprise BOM
 - Advanced structure/ configuration management
 - Improved document management (MS Office integration, structured docs)
- Engineering change management
- Process automation/ workflow
- Expanded visualization
 - Additional object adapter support
 - Incl. Lite visualization
 - ECAD validation with InterComm
- Enterprise user (light) seats
- Ability to add Windchill ProjectLink
 - Product development collaboration
 - Project management and execution
- Optional modules
 - Classification and reuse
 - Enterprise system integrations (e.g, SAP)
 - Adobe PDF integration

Select non-core functionality planned for next releases

Introducing the Pro/INTRALINK Data Migrator

Enables migration from Pro/INTRALINK 3.x to the 8.0 architecture

Key capabilities

- ⦿ Consolidation of multiple Pro/INTRALINK instances
- ⦿ Out of the box support for all Pro/ENGINEER file types
- ⦿ Migration of non-Pro/ENGINEER data currently managed in Pro/INTRALINK
- ⦿ Preservation of the history of migrated data
- ⦿ Works with a pre-populated target system
- ⦿ Optional part and product structure initialization

Benefits

- ⦿ Increased reuse with system consolidation
- ⦿ Simplified system administration
- ⦿ Improve product development in a dist. env.

Supported data

Administrative Data

- ⦿ Users
- ⦿ Attribute definitions
- ⦿ Folder structure

All Object Types

- ⦿ Both Pro/E and Non-Pro/E data
- ⦿ Maintain revision/version history
- ⦿ Main branch data only

File content

Relationships

Configurations

- ⦿ Named baselines
- ⦿ As-stored transaction IDs

Object Maturity

Attribute Values

- ⦿ User defined
- ⦿ System attributes

Forms

- ⦿ Completed RTP Forms
- ⦿ Check-in Form Comments

Rename History

How it works

Command line driven

```
Command Prompt
H:\>type "D:\User Profiles\sshaw\Desktop\New Text Document.txt"
Welcome to pre-configuration for Windchill Dataloader.
*****
Main Menu
*****
1.      Test Connections
2.      Download Admin Data from Pro/INTRALINK
3.      Reconcile Admin Data for Loading
4.      Load Admin Data
5.      Map Admin Data
6.      Create Rules
7.      Verify Pre-configuration
8.      Exit
*****
Please enter the number of operation that you would like to perform <1-6>:
H:\>
```

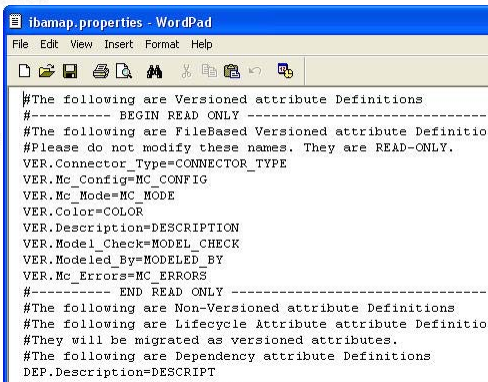

How it works

Controlled by host of editable mapping files

- Trailing spaces will be ignored.
- '=' is not a valid character
- The only editable fields are fields with '=' entry. Only t
side of such entries are editable.
- You should find two types of entries for each filevault, s
- FILEVAULT. Please specify an existing PDMLink filevaul
- NETWORK PATH. (required only for Move option) Please s
You can manually copy/move the Intralink filevault to

FILEVAULT. ILINK3303D:D:\ptc\ilink\vaults\CustomVault=migvault
NETWORK_PATH. ILINK3303D:D:\ptc\ilink\vaults\CustomVault=
FILEVAULT. ILINK3303D:D:\ptc\ilink\vaults\Default=migvault
NETWORK_PATH. ILINK3303D:D:\ptc\ilink\vaults\Default=

Some pitypedefnames can appear multiple times in this file with
type being 0 and/or 1 and/or 2. If this happens, migrator will
first try to migrate the object with the pitypedef as
first as secondary content(if the pitypedef appears with type 2)
if not possible, then EPHDocument(if the pitypedef appears with type 0)
or WTDDocument(if the pitypedef appears with type 1)
for EPHDocument: pitypedefname=0/@AuthoringApplication/@EPHDocumentType/@SubType/@Category
Animation Playback File=0/@PROE/@OTHER/@NULL/@Analysis Results
AnsysOut=0/@OTHER/@OTHER/@NULL/@NULL
Appearance=0/@PROE/@OTHER/@NULL/@PROE_UCG
AssembInfo=0/@PROE/@OTHER/@NULL/@PROE_UCG
Assembly=0/@PROE/@CADASSEMBLY/@NULL/@PROE_UCG
BendOrder=0/@PROE/@OTHER/@NULL/@PROE_UCG
BumpMapTexture=0/@OTHER/@OTHER/@NULL/@NULL
CableParams=0/@PROE/@OTHER/@NULL/@PROE_UCG
Cutting/@OTHER/@OTHER/@NULL/@Export

How it works

Database → database when possible

- ⦿ Avoiding MS business logic = performance
- ⦿ Works independently against software objects
- ⦿ Migration not complete until last object has migrated

How it works

Step 1: Load Administrative Data

- ⊙ Users
- ⊙ Folders
- ⊙ Attribute definitions

Step 2: Establish and Load Mapping

Step 3: Conflict Handling

- ⊙ Check for conflicts
- ⊙ Prescribe resolution
- ⊙ Zero conflict state required to continue

Step 4: Initiate Migration

- ⊙ Document
- ⊙ FT
- ⊙ Link
- ⊙ UDA
- ⊙ Baseline
- ⊙ AsStored
- ⊙ RTPForm
- ⊙ RenameHistory
- ⊙ FileTransfer
- ⊙ Part
- ⊙ BuildProcess

Step 5: Migrated data available in target

- ⊙ Unhide
- ⊙ Usable by non-administrative users

Migrates entire Pro/INTRALINK Database (no partial migrations)

Successes – Proving the technology

Customers are migrating today

- ◉ 7 **Production** accounts
 - Europe & North America
 - Small & large
- ◉ 8 Pre-production accounts
 - Actively working through the Testing phase
 - Production slated for Q2-3
- ◉ Pipeline growth continues
 - 8.0 customers lining up

Migration paths

It's more than just moving data

- ⊙ People
- ⊙ Processes
- ⊙ Data is the easy part

Engage PTC Global Services

- ⊙ Time and materials depending upon customer size and complexity

Certified Migration Partners

- ⊙ Set of VARs will be trained and certified as migration experts

Perform the migration in-house

- ⊙ Software general availability Oct. 2005
 - Free for Pro/INTRALINK customers on active maintenance
 - Training prerequisite removed
- ⊙ Prior to Oct. 2005 training required
 - Attend training get early access to Migrator
- ⊙ Training course
 - Migration tool training (2 days)
 - Administrative training (3 days)
- ⊙ PTC Services Health-checks
 - Available as separate purchase
 - Provides access to PTC migration experts
